Welcome to Refworks

What is RefWorks?

RefWorks is a web-based bibliographic citation manager that allows you to save and organize citations of journal articles, books, web sites and other sources. RefWorks automatically generates a bibliography or reference list in over 200 styles including commonly used styles like APA and MLA.

This service is freely available to all Brock students, staff and faculty and is accessible both on and off campus.

You will need to sign up for an individual account the first time you use RefWorks. Once you are in RefWorks, click on Sign up for an Individual Account (you will need to register with your Brock Email account).

Where do I find the Group Code?

When you register for your RefWorks account, you will receive an email with your username, password and Group Code. Keep this email. You will need the Group Code when you add RefWorks accounts to the group later.

Bird Diversity, Birdwatching Tourism and Conservation in Peru: A Geographic Analysis

Lisa Puhakka, Matti Salo, Ilari E. Saaksjarvi

Published: November 23, 2011 • DOI: 10.1371/journal.pone.0026785

Abstract

In the face of the continuing global biodiversity loss, it is important not only to assess the need for conservation, through e.g. gap analyses, but also to seek practical solutions for protecting biodiversity. Environmentally and socially sustainable tourism can be one such solution. We present a method to spatially link data on conservation needs and tourism-based economic opportunities, using bird-related tourism in Peru as an example. Our analysis highlighted areas in Peru where potential for such projects could be particularly high. Several areas within the central and northern Andean regions, as well as within the lowland Amazonian regions of Madre de Dios and Loreto emerge as promising for this type of activity. Mechanisms to implement conservation in these areas include e.g. conservation and ecotourism concessions, private conservation areas, and conservation easements. Some of these mechanisms also offer opportunities for local communities seeking to secure their traditional land ownership and use rights. (Spanish language abstract, Abstract S1.)

IN-TEXT CITATIONS
In-text citations

When **paraphrasing** or **summarizing**, the author’s name is followed by the year of publication

E.g. Morrison (1994) argues that libraries are a great place for students to start their research

**Direct quotes**

With the author’s name prefacing or following the quote

E.g. Morrison (1994, p. 324) states that “students who start their research in the library start their research in the right place.”

Author’s name not referenced in the text

E.g. She also argues that “students who don’t start their research in the library may be at a disadvantage” (Morrison, 1994, p. 325)
In general, when writing for a professional publication, it is good practice to make reference to other relevant published work. This view has been supported in the work of Cormack (1994).

Where you are mentioning a particular part of the work, and making direct reference to this, a page reference should be included:

Cormack (1994, pp.32-33) states that "when writing for a professional readership, writers invariably make reference to already published works".
Reference List
References List

- List all items alphabetically but author or authorship (regardless of format)

- Where there are several items by the same author they should be listed in order by date, earliest work first

- Additional lines do not have a hanging indent
References List

General format (book):
- Author., Year. *Title*. Place of publication: Publisher.

General format (journal article):
- Author., Year. Title of article. *Title of Journal*, volume(issue), page number(s).

More formats on the online style guides…
**Using Books, Journals and Newspapers**

- Books with one author
- Books with multiple authors
- Books which are edited
- Chapters of edited books
- Multiple works by the same author
- Books - translations/imprints/reprints
- E-books and pdfs
- PDF documents
- Print journal articles

**Journal articles accessed through a database**

For journal articles from an electronic source accessed through a password protected database from the University Library the required elements for a reference are:

**Author**, **Initials.**, **Year.** **Title of article.** **Full Title of Journal.** **[type of medium]** Volume number (Issue/Part number). Page numbers if available. Available through: Anglia Ruskin University Library website: <http://libweb.anglia.ac.uk> [Accessed date]

An example of a Cochrane Review

An example of an early view article from the BMJ

**Magazine or journal articles available on the internet**

- Journal abstract from a database
- Newspaper articles
- Online newspaper articles

**Using Other Source Types**

- Acts of Parliament
USING BOOKS, JOURNALS AND NEWSPAPERS

- Books with one author
- Books with multiple authors
- Books which are edited
- Chapters of edited books
- Multiple works by the same author
- Books - translations/imprints/reprints
- E-books and pdfs
- PDF documents
- Print journal articles
- Journal articles accessed through a database

Magazine or journal articles available on the internet

For an article from a web-based magazine or journal, which is freely available over the web, the required elements for a reference are:

Authors, Initials., Year. Title of article. Full Title of Magazine, [online] Available at: web address (quote the exact URL for the article) [Accessed date].

An in-text reference for the above example would read:

(Kipper, 2008)...
write-n-cite
